

Assessment of the Impacts of Digital Marketing and Social Media on Global Leadership

Muhammad Rafiqul Alam · PhD Program Applicant
Faculty of Graduate Studies, University of Kelaniya, Sri Lanka

Introduction

Digital Transformation

Changed global leadership practices

Social Media

Influences communication & stakeholder engagement

Digital Marketing

Enables organizations to reach global audiences efficiently

Adaptation

Leaders must adapt to technology-driven environments

Background of the Study

- **Platform Transformation**
Facebook, LinkedIn, Instagram & X transformed leadership communication
- **Transparency & Interaction**
Leadership now more transparent and interactive
- **Digital Branding**
Organizations depend on digital communication for branding & engagement
- **Core Competency**
Digital leadership has become a core organizational competency

Research Problem

Traditional Reliance

Many leaders still rely on traditional leadership approaches

Digital Competency Gap

Lack of digital competencies affects leadership effectiveness

Misinformation Risk

Social media increases risks of misinformation and reputational damage

Research Gap

Limited research on combined impact of digital marketing & global leadership

Justification of the Study

Literature Gap

Addresses gaps in digital leadership literature

Practical Insights

Provides practical insights for organizations

Developing Economies

Important for developing economies like Bangladesh

Strategic Adaptation

Supports strategic adaptation to digital transformation

Specific Objectives

01

Digital Marketing in Strategy

Analyze digital marketing in leadership strategies

02

Social Media & Communication

Evaluate social media influence on communication

03

Digital Literacy

Assess digital literacy and leadership effectiveness

04

Data Analytics

Investigate data analytics in decision-making

05

Risks & Challenges

Identify risks and challenges in digital leadership

Research Questions

1

Leadership Strategy

How does digital marketing influence leadership strategies?

2

Stakeholder Engagement

How do social media platforms affect stakeholder engagement?

3

Digital Literacy

How does digital literacy impact leadership effectiveness?

4

Major Risks

What are the major risks of digital leadership?

5

Engagement Strategies

How can organizations improve digital engagement strategies?

Research Hypotheses

H1

Digital marketing **positively impacts** leadership strategy

H2

Social media **improves** communication effectiveness

H3

Digital literacy **enhances** leadership effectiveness

H4

Data analytics **improves** decision-making quality

H5

Social media usage **increases** reputational risks

Conceptual Framework

Framework Structure

Independent variables influence dependent variables, with moderating factors shaping outcomes.

Independent Variables

Digital Marketing, Social Media, Data Analytics, Digital Literacy

Dependent Variables

Leadership Effectiveness, Organizational Performance, Stakeholder Engagement

Moderating Variables

Culture, Industry Type, Organizational Size

Digital Leadership & Transformational Leadership

Digital Leadership Theory

Leaders integrate digital tools into organizational strategies. Technology-driven communication improves influence, and digital visibility enhances leadership effectiveness.

Transformational Leadership

Leaders inspire through communication and vision. Social media enhances emotional engagement, and digital storytelling supports organizational branding.

THEORETICAL FRAMEWORK

TAM & Diffusion of Innovation

Technology Acceptance Model

Explains how and why individuals adopt new technologies within organizations.

Diffusion of Innovation

Explains how digital transformation spreads across organizations and industries.

Leaders as Change Agents

Leaders drive digital adoption, acting as catalysts for organizational transformation.

What Existing Research Shows

- **Digital Leadership**
Improves innovation and competitiveness across organizations.
- **Social Media**
Enables direct stakeholder communication at scale.
- **Digital Marketing**
Strengthens branding and audience engagement.
- **Key Limitation**
Existing research lacks integrated frameworks connecting these domains.

Identifying the Gaps

Why These Gaps Matter

Current literature lacks integrated digital leadership models, empirical studies using SEM, strategic digital competency frameworks for leaders, and research focused on developing countries — all critical gaps this study addresses.

Mixed-Method Research Approach

The study combines quantitative and qualitative approaches in a cross-sectional, explanatory design using a deductive research approach. The target population includes CEOs, senior executives, marketing professionals, digital specialists, and employees in multinational organizations, with a sample size of 200–400 respondents selected through purposive and snowball sampling techniques.

Methods & Tools

Primary Data

- Structured questionnaires
- Key Informant Interviews (KII)
- Focus Group Discussions (FGD)

Secondary Data

- Academic journals & industry reports
- Websites & digital analytics reports

Quantitative Analysis

- SPSS — correlation & regression analysis
- Structural Equation Modeling (SEM)

Qualitative Analysis

- Thematic analysis
- Content analysis

MEASUREMENT EXAMPLE

Engagement Rate: A Key Metric

Formula

$$\frac{(\text{Likes} + \text{Shares} + \text{Comments})}{\text{Followers}}$$

Example Data

Followers: 10 Lacs | Likes: 3 Lacs | Shares: 2 Lacs | Comments: 1 Lac

Result

Engagement Rate = 60%

Expected Contributions & Study Limitations

Academic Contributions

- Enriches digital leadership theory
- Develops integrated conceptual framework
- Provides empirical evidence

Practical Contributions

- Improves organizational communication
- Supports data-driven leadership
- Enhances digital leadership competencies

Study Limitations

- Respondent bias may affect findings
- Rapid changes in digital technology
- Limited generalizability
- Access limitations to high-level executives

Looking Ahead

Emerging Technologies

Explore AI, big data, and blockchain in leadership.

Cross-Country Studies

Conduct comparative cross-country research.

Longitudinal Methods

Apply longitudinal research methods.

Ethics & Cybersecurity

Study ethics and cybersecurity in digital leadership.

Conclusion: Digital marketing and social media are transforming global leadership. Leaders require digital literacy and strategic adaptability. Effective digital leadership improves competitiveness and stakeholder engagement. The study contributes academically and practically.
